EXAMINER'S AMENDMENT

An informal examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification, page 1, line 7, after "U.S. Patent", "____(serial number 10/077,079)" has been deleted; same line after "U.S. Patent", "--application serial number 10/077,079--" has been inserted. On page 1, line 8, after "U. S. Patent", "____(serial number 10/077,146)" has been deleted; same line after "U.S. Patent", "--application serial number 10/077,146--" has been inserted.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

This communication is an Examiner's reasons for allowance in response to application filed on 02/15/2002, assigned serial 10/077,080 and titled "Programmatically Computing Street Intersections Using Street Geometry."

The following is the Examiner's statement of reasons for the indication of allowable subject matter:

The prior art closest to the subject matter of claims 1, 12, 16, 18, and 20 is the reference of Nocek et al. (US 6587782), in which the geographic data base stores a plurality of subset data which could be the data of the first street, the other streets, and the intersections. The geographic database as said do not limit the data stored in the database for the first street, but the geographic database could stores the other streets data. According to Nocek et al. the intersection with its geographic location stored in the

data based is determined plus the address of the first street can be found in the street data. In addition, the geographic data of road segment or intersections, which have been stored in the geographic database can be read and are available for user to use on their ways. It is found that Nocek et al. do not disclose the limitations as now claimed in the independent claims 1, 12, 16, 18, and 20. Thus, the final rejection has been withdrawn and it is set in a condition for allowance.

The prior art searching has been updated, however, none of the references or the combination has been found teaches or suggests such a system claimed by applicant. Therefore, the application is now patentable accordingly.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan C To whose telephone number is (703) 308-6273. The examiner can normally be reached on from 8:00AM to 5:00PM.
